

HOSTESS™ SV24+

& SynchLink Software

Low Cost Synchronous Communications

The Hostess SV24+ and its SynchLink software is an obvious choice for low cost synchronous communications. It is an economical 2 port non-intelligent controller that provides a single synchronous V.11, X.21 Network connection, or two asynchronous V.24 connections. It can operate at speeds of up to 1.28 Mbps and supports both full and half duplex data transfer modes.

To work alongside the Hostess SV24+, Control provides the SynchLink drivers and API's for Windows NT and Windows 95. This enables the Hostess SV24+ to operate like a network adapter over a synchronous serial communications link. Alternatively you can directly interface with the SV24+ using the SynchLink Application Programming Interface.

The SynchLink software operates between two PC's each fitted with the Hostess SV24+ and running either Windows NT or Windows 95. The PC's can be connected directly with a cable or through data communications equipment like Kilostream NTEs. The Hostess SV24+ can be used to link between two LANs, or to provide Remote Access between a branch office and a central site using a single number.

Although installation and configuration are different for the two operating systems, SynchLink can be used to interconnect a Windows 95 and a Windows NT 4.0 system.

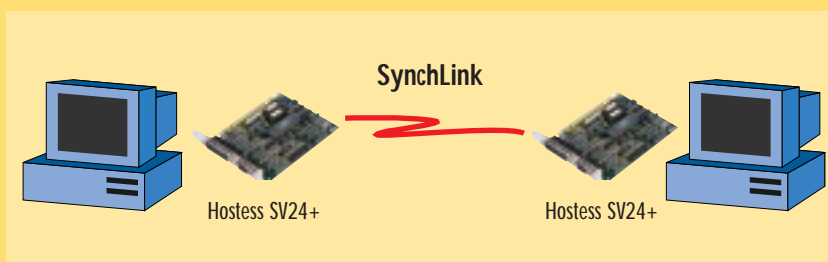

HOSTESS™ SV24+ & SynchLink Software

2 port controller for synchronous and asynchronous communications

- ◆ Single synchronous V.11, X.21 Network connection or two asynchronous V.24 connections
- ◆ High speed wide-area communications
- ◆ Standard protocols, TCP/IP and NETBEUI
- ◆ API for bespoke development
- ◆ Speeds up to 1.28 Mb
- ◆ Up to 90% bandwidth available for application data
- ◆ Works with Windows 95 and Windows NT4 and can interconnect to either system
- ◆ Installation/Removal via Control Panel
- ◆ Detailed Hardware and Software Manual available
- ◆ Pan European approval for connection to X.21 digital circuits

Typical Applications

- ◆ Satellite Communications
- ◆ X.25 Communications
- ◆ Interface to existing synchronous equipment

All Hostess controllers come with full technical support and an excellent 5 year warranty. Specifications are subject to change at any time and without notification.
